

GDF36-12Z/0.35 Outline diagram

GDF36-12Z/0.35

Power	0.35 kw	Weight:	2.3KG
Voltage	Y to 380V/Δ to 220V	Shaft end connection:	cylindrical key connection
Current	1.1A/1.8A	Cooling method:	air cooling
Frequency	200 Hz	Bearing lubrication method:	grease lubrication
Rotating speed	12000 r/min	High-precision angular contact ball bearing:	1×6003 1×6000/P4
		Rotating direction:	left thread L/right thread R rotating directions, used in pair!

Special attention: thread locking adhesive shall be applied or the spring washer shall be added to prevent the looseness during the installation of the fastening screw!
