

GDF60-18Z/4.5

Motor type: Three-phase asynchronous

Power: 4.5kw

Voltage: 380V

Current: 9.0A

Frequency: 300Hz

Rotational speed: 18000r/min

Notice: 1. It shall apply thread adhesive or spring washer to prevent loosening while mounting fastening screw!

2.The wires of the temperature control switch are led out from the junction box.

Weight: 12KG

Cooling method: DC24V DC fan

Lubrication method of bearings: grease lubrication

Rotation direction: Counterclockwise viewed from the shaft extension

Parameters of the stator thermal control switch	
DC power supply	Maximum DC48V/5A
AC power supply	Maximum AC250V/5A
Protective temperature	Maximum 100℃
contact configuration	Normally closed
