

GDF46-12Z/1.5 220V/380V Profile drawing

GDF46-12Z/1.5

Power:1.5kw

Voltage:Δ220V/Y380V

Current:Δ6.3A/Y3.6A

Frequency:200Hz

Rotational speed:12000r/min

Cooling method: Air cooling

Lubrication method of bearings:grease lubrication

Rotation direction:Counterclockwise viewed from the spindle nose to the end of spindle(See arrow direction for details)

Notice:It shall apply thread adhesive or spring washer to prevent loosening while mounting fastening screw!
